PROFESSIONAL SUMMARY

Web Developer managing production websites end-to-end – strategy, development, deployment, staging/production environments, security hardening, and system integrations - for enterprise and mid-sized clients. AWS Certified Solutions Architect - Associate, currently applying that certification to hands-on cloud deployment work and pursuing a cybersecurity-focused degree at Lone Star College. Bringing deep operational experience in web infrastructure into a focused move toward cloud/DevOps.

Core Strengths

- Deployment & environment management: staging/production workflows, QA=>UAT=>release cycles, incident response, and post-release monitoring for high-traffic client sites.
- Security-conscious development: CMS hardening, malware remediation, and end-to-end GDPR compliance implementation.
- Cross-platform integrations: connecting CMS platforms, form systems, and project tools (Zapier, Monday.com API, Google Workspace) with reliable data capture, backup, and recovery.
- Fast, self-directed technical range across CMS platforms and, now, cloud infrastructure.
- Strong client-facing skills: training, consultation, and cross-team collaboration.

CERTIFICATIONS & EDUCATION

- AWS Certified Solutions Architect - Associate (SAA-C03) — 2026
- Meta React Specialization (Professional Certificate), Coursera — completed 2026
- Lone Star College (LSC) — Associate of Science in progress, cybersecurity pathway, started Spring 2025
- Coursework/certificates in Python, Laravel, and Next.js — Coursera / LinkedIn Learning (self-directed, ongoing)

TECHNICAL SKILLS

Certified / Formal Training: AWS (EC2, S3, CloudFront, IAM, VPC – SAA-C03), React (Meta Professional Certificate), Python (college coursework)

Professional / Hands-On Experience: JavaScript, HTML, CSS, jQuery, PHP, MySQL, WordPress and other Open Source CMS (custom theme & plugin development), ecommerce development and management, deployment pipelines, Git, REST API integrations, Adobe Experience Manager (AEM), Adobe Launch/TMS/Analytics, website security hardening & incident response, SEO & analytics, Containerization (working level)

Working Knowledge / Continuing Study: MongoDB, DynamoDB, Laravel, Next.js, cybersecurity fundamentals (in-progress coursework)

PROFESSIONAL EXPERIENCE

Web Developer & Infrastructure Consultant | Independent Contractor — BMC Software, Seven Fifths Creative, Web Locomotive

March 2019 – Present

- Own full lifecycle infrastructure and delivery for recurring enterprise and event-site clients: staging/production environment management via WP Engine, QA=>UAT=>release cycles, and post-deployment monitoring.
- Architect and maintain the Utility Perspectives (UP) and Infrastructure Safety Symposium (ISS) event platforms for Seven Fifths Creative (2022–present), including digital invites, modern animated front-end design implementations, restricted member-access systems, custom integrations mapping registration form data to Zapier, Google Workspace, and a bespoke Monday.com API integration, plus data backup and recovery handling for registration data.
- Resolve live-event technical issues in real time during high-traffic registration periods, including analytics, Open Graph/social-sharing, and third-party integration failures.
- Apply security hardening and restricted data practices across client sites.
- Contributed to Adobe Experience Manager (AEM) site updates and workflow improvements (2020, 2022).
- Building applied AWS experience by deploying a React/Vite/Chakra UI application to S3 + CloudFront with API Gateway, applying concepts from AWS Solutions Architect coursework.

Tech: WordPress, WP Engine, PHP, JavaScript, AEM, Zapier, Monday.com API, Git, AWS (S3, CloudFront, API Gateway), Docker

Web/Integrations Developer | BMC Software — Web Marketing

August 2016 – February 2019

- Owned GDPR compliance implementation for BMC Software's corporate multilingual websites end-to-end, from initial planning through deployment, coordinating across legal, marketing, and technical teams.
- Restructured, migrated, and managed Adobe Launch (Tag Management) implementation supporting analytics, Adobe Target A/B testing, and third-party tracking integrations.
- Supported the migration of BMC.com from a legacy enterprise CMS to Adobe Experience Manager (AEM), ensuring functional continuity through the transition.
- Partnered with front-end teams on new site builds and third-party vendor integrations.

Tech: JavaScript, PHP, Adobe Launch/TMS, Adobe Target, WordPress, AEM, Git

Full-Stack Web Developer & Consultant | Independent Contractor — Savage Brands, Web Locomotive

May 2016 – July 2016

- Developed custom CMS solutions for enterprise clients and implemented web optimizations to support lead generation and UX.

Tech: WordPress, jQuery, PHP, Git

Lead Web Developer & Technical Consultant | Savage Brands

September 2014 – May 2016

- Built reusable code frameworks that improved development efficiency and long-term maintainability across client web properties.
- Led security and performance optimization efforts across client sites.
- Delivered tailored web solutions and year-end reporting/data visualization for oil and gas industry clients (OilStates).
- Mentored junior developers and helped establish reusable component libraries to reduce redundant work.

Tech: PHP, JavaScript (jQuery), WordPress, Cloud Hosting, Git

Web Developer & Consultant | FDI Creative, CME Printing, NRG Marketing Group, Web Locomotive

August 2010 – August 2014

- Built and optimized e-commerce platforms (Magento) and custom Open Source CMS (Joomla, Drupal, WordPress) sites for oil & gas and mid-sized business clients.
- Conducted SEO audits and competitive analyses to inform client digital strategy.

Tech: WordPress, Magento, JavaScript, PHP, Hosting & Security

SELECTED ACHIEVEMENTS

- Owned GDPR compliance rollout across all BMC Software multilingual web properties, from concept to implementation.
- Built and maintain the infrastructure and integration layer behind two recurring industry event platforms (UP, ISS) for four consecutive years, including registration systems, staging/production release cycles, and third-party data integrations.
- Developed a custom WordPress base theme for Quanta Energy, establishing consistent branding and maintainability across the company's subsidiary sites.
- Mentored 10+ junior developers across agency roles, contributing to the delivery of 20+ client projects.
